

Anita S. Løvtedt

PhD Canditate

Dear all,

I am running for representative of Group B, because I want to do my part in making the work environment for temporary scientific employees as productive as it can be.

I believe that our main focus should be on the quality of our work, as well as development of our skills and our career. One of my main points of focus, will be on facilitating this.

The Faculty of Mathematics and Natural Sciences has several institutes, each having temporary scientific employees whose needs may differ from the others. If elected, my goal is to be a representative for all of you.

Best regards
Anita

Academic background:

- ❖ Bachelors degree in Mathematical Subjects
- ❖ Masters degree in Applied and Computational Mathematics
- ❖ PhD Candidate in Biological Oceanography (current)
