

# BEYOND OIL

Prioritising climate action

Bergen and digital: October 20.–21. 2021

## PROGRAMME

Centre for Climate  
and Energy Transformation

# *How do we prioritise climate action?*

Society is inevitably moving beyond oil.

However, ambiguous targets and plans for phasing out fossil fuels are not sufficient for solving the climate emergency. Climate action must be a priority across all areas of society. We must ask ourselves what it means to prioritise climate action - for the individual, our economy, our political decisions, and our societal institutions.

How can we overcome simplistic binaries between welfare and convenience on one hand, and responding to the climate emergency on the other?

How do we mobilise the societal change necessary to make prioritisation of climate action a reality?

#BeyondOil2021

@UiBCET

# ~~BEYOND OIL:~~ Prioritising climate action

## Welcome to the fourth Beyond Oil conference!

---

During this year's conference, we are asking what it means to prioritise climate action in our complex societies. Scholars from a range of disciplines have signed up to help us unpack and explore the role of climate change today and the potential outcomes of making climate action a top priority now and in the future. There are more parallel sessions than ever before and we are so excited to meet all the physical and virtual Beyond Oil 2021 participants.

Thank you to the amazing keynotes and the presenters who have submitted such interesting abstracts (make sure to check out [the book of abstracts!](#)).

Like many other things, the planning of this year's conference has been heavily influenced by the COVID-19 pandemic and the continuously changing restrictions. For the first time, we are organising the conference as a hybrid event, and we are ready to learn from the experience. Those of you who have attended the conference in previous years will notice that we've also had to make some changes to our beloved presentation format – this year, the 8-minute presentations will be followed by a panel conversation rather than our usual 'corner dialogues'.

We would appreciate feedback in regard to what works and what does not work, for us to consider for our next conference.

We hope you enjoy the conference!

# Short programme

## Wednesday 20<sup>th</sup>

08:30	<b>Registration and coffee</b>	Fossestova + Brasseriet
09:15	<b>Opening of Beyond Oil 2021</b> <i>By Håvard Haarstad, Director of Centre for Climate and Energy Transformation. Music by Ingrid Horvei Lyslo</i>	Auditoriet
09:30- 11:20	<b>Keynote 1: Who can do what to stop catastrophic climate change? + Navigating race, representation and climate action</b> <i>By Kim Nicholas and Charles Ogunbode</i> <i>Moderator: Brooke Wilkerson</i>	Auditoriet
11:30	<b>Lunch</b>	Brasseriet
12:30- 14:00	<b>Parallel session 1:</b> - Engaging the public in support of sustainable transitions (stream) - Decarbonising the energy sector - Public perspectives on sustain-able transport - Policy cooperation in the transport sector	Auditoriet Olav H. Hauge Alver Zinken Hopp
14:00	<b>Coffee break</b>	Brasseriet
14:30- 15:50	<b>Parallel session 2:</b> - Innovation towards low carbon futures (stream) - Space and time dimensions - Motivations for action - Portrayals of public concern	Auditoriet Olav H. Hauge Alver Zinken Hopp
16:00- 17:30	<b>Keynote 2: Prioritizing climate change in theory and practice</b> <i>Introduction by John Broome and panel discussion with Natalia Golis, John Broome, and Vigdis Vandvik</i> <i>Moderator: Scott Bremer</i>	Auditoriet
19:00	<b>Conference dinner</b>	Skyskraperen

# Thursday 21<sup>st</sup>

09:30	<b>Coffee and snack</b>	Brasseriet
10:00-11:30	<b>Parallel session 3:</b> <ul style="list-style-type: none"><li>- Changing systems and infrastructure (stream)</li><li>- Justice implications</li><li>- A politics of disassembly or a politics of reconnection?</li><li>- The role of policy actors and their perspectives</li></ul>	Auditoriet Olav H. Hauge Alver Zinken Hopp
11:30	<b>Lunch</b>	Brasseriet
12:30-14:00	<b>Keynote 3: There is no 'I' in individual: the need to connect personal, collective and systemic climate action</b> <i>By Stuart Capstick</i> <i>Commentator: Camilla Houeland</i> <i>Moderator: Shayan Shokrgozar</i>	Auditoriet
14:00	<b>Coffee break</b>	Brasseriet
14:30-15:50	<b>Parallel session 4:</b> <ul style="list-style-type: none"><li>- Power and energy justice (stream)</li><li>- Structures and institutions for climate justice</li><li>- Institutional perspectives on climate action</li></ul>	Auditoriet Olav H. Hauge Alver
16:00-16:30	<b>Closing panel</b> <i>Moderator: Agnete Hessevick</i>	Auditoriet
17:00	<b>Conference closes</b>	

**Wednesday 20<sup>th</sup>**

---

**08:30**

**Registration, coffee and snack**

*Room: Fossestova + Brassieriet*

---

**09:15**

**Opening of Beyond Oil 2021**

## Charles Ogunbode

*Assistant professor of Applied Psychology at University of Nottingham*

*Read more at [page 29](#)*

---

11:30 - 12:30 Lunch in Brasserie

---

12:30 - 14:00

## Parallel Session 1

---

### Engaging the public

*Room: Auditoriet (Stream)*

---

Gisela Böhm	<i>University of Bergen</i>	Public perceptions of the who, what, and why of energy transition pathways
Katharina Biely	<i>Delft University of Technology</i>	Behavioral change for a socio-economic transition: linking system with individual behavior in complex systems
Pinar Majidova	<i>University of Aberdeen</i>	Power struggle in climate change issues
Thomas Y. Chen	<i>Academy for Mathematics, Science, and Engineering</i>	Empowering Citizen Scientists through Machine Learning Tools for Collective Climate Action

---

---

14:00 - 14:30 Coffee Break in Brasserie

---

12:30 - 14:00

## Parallel Session 1

---

### Decarbonizing the energy sector

*Room: Olav H. Hauge*

---

Siddharth Sareen	<i>University of Bergen</i>	Conceptualising fossil fuel displacement: Scales and practices of legitimation
Erling Moxnes	<i>University of Bergen</i>	The economics of future oil production
Rebekka Frøystad	<i>Chalmers University of Technology, Gothenburg, Sweden</i>	An investigation of the physical and societal limits to hydroelectric power generation and storage in Western Norway
Amber Nordholm	<i>Norwegian University of Science and Technology</i>	Accelerating complex and contested technology to meet climate goals: A carbon capture study

---

---

14:00 - 14:30 Coffee Break in Brasseriet

---

12:30 - 14:00

## Parallel Session 1

---

### Public perspectives on sustainable transport

*Room: Alver*

---

Annina Thaller	<i>University of Graz, Austria</i>	Pushing low-carbon mobility: A survey experiment on the public acceptance of disruptive policy packages
Devyn Remme	<i>University of Bergen</i>	Mind the gap: Commoning urban mobility in Bergen, Norway
Thea Valler	<i>Norwegian University of Science and Technology</i>	Rebuilding a Bike Kingdom: the Case of a Chinese Bicycle Highway
Mari Helliessen	<i>University of Bergen</i>	Framing effects on climate policy support: The role of values and ideology

---

---

14:00 - 14:30 Coffee Break in Brasseriet

---

12:30 - 14:00

## Parallel Session 1

---

### Policy cooperation in the transport sector

*Room: Zinken Hopp*

---

Cecilie Gro Vindal Ødegaard	<i>University of Bergen</i>	Automation Shift for the Energy Shift? An explorative case from Killingøy, Norway
Agnete Hessevik	<i>University of Bergen</i>	Effects of network membership on green strategies in offshore shipping companies
Rafael Rosales	<i>University of Bergen</i>	Participatory planning for sustainable urban logistics transport

---

---

14:00 - 14:30 Coffee Break in Brasserie

---

# 14:30 - 15:50

## Parallel Session 2

---

### Innovation towards low carbon futures

*Room: Auditoriet (Stream)*

---

Viktor Werner	<i>Linköping University</i>	From collective decision-making to transition agendas: aligning problems, solutions and institutional contexts in demonstrations
Geoff Isaac	<i>University of Technology Sydney</i>	Confronting the plastic crisis
May Lee	<i>Tohoku University, Japan</i>	Assessment of the Clean Energy Strategies of Oil Majors: Words, Dollars and Actions
Thomas M. Sattich	<i>University of Stavanger</i>	The Norwegian shipping industry and decarbonization. With a proactive regulatory strategy towards growing global demand for climate technology?
Per-Anders Langendahl	<i>Swedish University of Agricultural Sciences</i>	The politics and power struggles of intermediation in shaping niche innovation trajectories: a longitudinal case study on development and uptake of demand response in the UK

---

# 14:30 - 15:50

## Parallel Session 2

---

### Space and time dimensions

*Room: Olav H. Hauge*

---

Martin Wetterstedt	<i>Uppsala University</i>	Policies and measures to prioritize climate action - Can budgeting help and what else is needed?
Hedda Susanne Molland	<i>University of Bergen</i>	Reinventing carbon capture and storage: Political justifications for a new Norwegian strategy in 2014
Subina Shrestha	<i>University of Bergen</i>	Cities' Climate Action: Interlinkages, experiences and planning frameworks
Simon Neby	<i>University of Bergen</i>	Time and climate governance: multi-level cooperation as a multi-temporal problem

---

# 14:30 - 15:50

## Parallel Session 2

---

### Motivations for action

*Room: Alver*

---

Marius Korsnes	<i>Norwegian University of Science and Technology</i>	Matters of Concern in the Norwegian Sustainability Transition
Eleanor Johnson	<i>University of Oslo</i>	Beyond the spectacle: Extinction Rebellion Norway
Kjersti Fløttum	<i>University of Bergen</i>	People's expressed motivations for action and change of everyday lifestyle

---

14:30 - 15:50

## Parallel Session 2

---

### Portrayals of public concern

*Room: Zinken Hopp*

-------------------------	----------------------	----------------------

---

16:00 - 17:30

## Keynote 2

---

### **Prioritizing climate change in theory and practice**

*Introduction by John Broome followed by panel discussion with Natalia Golis, John Broome, and Vigdis Vandvik*

*Room: Auditoriet*

*Moderator: Scott Bremer*

---

#### **John Broome**

*Emeritus White's Professor of Moral Philosophy at the University of Oxford*

*Read more at [page 30](#)*

#### **Natalia Golis**

*Deputy County Mayor in the Vestland County Council, representing the Green Party*

*Read more at [page 31](#)*

#### **Vigdis Vandvik**

*Professor of plant ecology at the University of Bergen*

*Read more at [page 32](#)*

---

19:00

## **Conference dinner at Skyskraperen**

---

Thursday 21<sup>st</sup>

---

09:30

**Coffee and snack**

*Room: Fossetova + Brasserie*

---

10:00 - 11:20

## Parallel Session 3

---

### Changing systems and infrastructure

*Room: Auditoriet (Stream)*

---

David Walwyn	<i>University of Pretoria</i>	Transforming an awareness of energy technologies to personal accountability for climate action; experiences in the virtual classroom through the lens of discursive institutionalism
Miguel Valdez	<i>The Open University</i>	Developing EV charging infrastructures in the UK: a window on translocal networks, multiplicity and (in) coherence in local carbon transitions and transformations
Gordon Walker	<i>Lancaster University</i>	Orchestrating the Low Carbon Beat: Rhythmanalysis, Energy and Rhythms in Transition
David Sadoway	<i>Kwantlen Polytechnic University</i>	Expanding Urban Carbonscapes: The Political Paradoxes & Perils of Pipelines, Automobility and Climate Change in/upon Coast Salish Territories (Metro Vancouver)

---

---

11:30 - 12:30 Lunch in Brasserie

---

10:00 - 11:20

## Parallel Session 3

---

### Justice implications

*Room: Olav H. Hauge*

---

Sigrid Eskeland Schütz	<i>University of Bergen</i>	Prioritising under contested public perceptions - how policy, regulation, technology and responsible research and innovation frame public perception on climate technologies
Oskar Vågerö	<i>University of Oslo</i>	The inclusion of justice perspectives in energy systems modelling - A review of current practices and the way ahead
Mathias Lindkvist	<i>KTH Royal Institute of Technology</i>	Ultimate ends and sustainability action: a conceptual study on human well-being
Shayan Shokrgozar	<i>University of Bergen</i>	Appropriating Energy to Serve a Degrowth Society: The Implications of Wind Power for Saepmi and the Convivial Alternative

---

---

11:30 - 12:30 Lunch in Brassieriet

---

10:00 - 11:20

## Parallel Session 3

---

### **A politics of disassembly or a politics of reconnection?**

*Panel session: David Jordhus-Lier & Camilla Houeland, University of Oslo, Håvard Haarstad, University of Bergen & Tarje I. Wanvik,*

*Norve*

*Room: Alver*

---

---

11:30 - 12:30 Lunch in Brassieriet

---

10:00 - 11:20

## Parallel Session 3

---

### The role of policy actors and their perspectives

*Room: Zinken Hopp*

---

Runa Falck	<i>University of Bergen</i>	Attribution of climate mitigation responsibility: a comparison of politicians and citizens
Jana Paulina Scheurer	<i>University of Bergen</i>	School as a Key Arena to Promote Climate Action
Marta Lorenz	<i>University of Bergen</i>	Research to support the goals: Publishing trends in climate action and energy transitions
Rouven Doran	<i>University of Bergen</i>	Can scientific communication help mobilize public support for climate action?

---

---

11:30 - 12:30 Lunch in Brasserie

---

12:30 - 14:00

## Keynote 3

---

### **There is no 'I' in individual: the need to connect personal, collective and systemic climate action**

*Room: Auditoriet*

*Commentator: Camilla Houeland*

*Moderator: Shayan Shokrgozar*

---

### **Stuart Capstick**

*Deputy Director, Centre for Climate Change and Social Transformations (CAST)*

*School of Psychology, Cardiff University, Park Place, Cardiff*

# Kimberly Nicholas

Associate Professor of Sustainability Science and Director of PhD Studies  
Lund University Centre for Sustainability Studies (LUCSUS)

[kimnicholas.com](mailto:kimnicholas.com) @KA\_Nicholas

## Keynote 1: Who can do what to stop catastrophic climate change?

Shutting down fossil fuels fast and fairly is a big job. How can human beings, and our systems of money, politics, culture, and practice, get it done in time to meet the Paris Agreement? To make these shifts, we'll need to redefine, and then remake, what is humanly possible: what humans are capable of making possible. To get there, we'll need to harness facts, feelings, and action. Three guiding principles to make this shift from exploitation to regeneration are to simultaneously promote human and ecosystem health and well-being; reduce harmful practices at

their source; and strengthen the resilience of both human and natural communities. For each of us, figuring out how you can contribute to, sustain, and find meaning and joy in this work is a primary duty of being alive at this moment.

## Bio:

---

[Dr. Kimberly Nicholas](#) is Associate Professor of Sustainability Science at Lund, Sweden's highest-ranked university. In her research, she studies the connections between people, land, and climate. Her goal is to understand how to steward ecosystems to support a good life for everyone alive today and leave a thriving planet for future generations.

Born and raised on her family's vineyard in Sonoma, California, she studied the effect of climate change on the California wine industry for her PhD in Environment and Resources at Stanford University. Since then, she has published over 50 articles on climate and sustainability in leading peer-reviewed journals, and her research has been featured in outlets including USA Today, The Atlantic, The New York Times, The Washington Post, and more. She has also been profiled in Elle and The Guardian and gives talks at around 50 lectures each year. She is the author of the popular science nonfiction book [UNDER THE SKY WE MAKE: How to be Human in a Warming World](#) (Putnam/Penguin Random House, March 2021).

Follow Kim on [Twitter](#), [LinkedIn](#), and [Instagram](#), and check out her monthly climate newsletter, [We Can Fix It](#).

# Charles Ogunbode

*Assistant professor of Applied Psychology  
University of Nottingham*

## **Keynote 1: Navigating race, representation and climate action after Floyd: reflections on the UK environment sector**

Climate change is fundamentally interlinked with race. Whether race is explicitly mentioned or not, we cannot talk about climate change without addressing race. Racism enabled the climate crisis. Racialised communities suffer disproportionately severe impacts from climate change. Fairer representation of the voices and experiences of the most impacted communities of people of colour is integral to achieving just and equitable solutions to climate change. Yet, many climate and environmental groups in the UK lack ethnic diversity and are ill-equipped

to represent the concerns of vulnerable ethnic minority communities. Large segments of the public also lack understanding of the disproportionate impacts of climate change and how climate change relates to racial injustice. Against this background, I will discuss the evolving landscape of ethnic minority engagement in the UK environment sector; aspirations for, and barriers to, diversity and inclusion in environmental campaigns, as well as the implications for climate justice in the post-Floyd era.

### **Bio:**

---

Charles Ogunbode is an Assistant Professor of Applied Psychology at the University of Nottingham, UK. His research interests are in understanding how social influence, personal experiences and the media environment shape the way people respond to climate change. He is also interested in the effects of climate change in mental health and wellbeing.

# John Broome

*Emeritus White's Professor of Moral Philosophy at the University of Oxford*

## Keynote 2: Prioritizing climate change in theory and practice

Climate action must be a priority across all areas of society. A theme for the Beyond Oil conference 2021 is to discuss what it means to prioritise climate action - for the individual, our economy, our political decisions, and our societal institutions. In this session we look at the prioritization and trade-offs that are particularly challenging – for example when climate action can endanger biodiversity and the environment. The panelists will address this from different angles, from philosophical to practical politics.

### Bio:

---

John Broome is Emeritus White's Professor of Moral Philosophy at the University of Oxford. He has made major contributions to contemporary moral philosophy. His research combines the formal method of economics with the philosophical analysis. Among many published works is the book *Climate Matters: Ethics in a Warming World*. Here he considers the moral dimensions of climate change, and reasons clearly through what universal standards of goodness and justice require of us, both as citizens and as governments.

# Natalia Antonia Golis

*Deputy County Mayor in the Vestland County Council, representing the Green Party*

## Keynote 2: Prioritizing climate change in theory and practice

Climate action must be a priority across all areas of society. A theme for the Beyond Oil conference 2021 is to discuss what it means to prioritise climate action - for the individual, our economy, our political decisions, and our societal institutions. In this session we look at the prioritization and trade-offs that are particularly challenging – for example when climate action can endanger biodiversity and the environment. The panelists will address this from different angles, from philosophical to practical politics.

## Bio:

---

Natalia Antonia Golis is the Deputy County Mayor in the Vestland County Council, representing the Green Party. In her political career she has held a range of central positions in the Green Party both locally and nationally, and she has broad knowledge about the particular challenges of Vestland county (Western Norway). Her main areas of interest are public communication, regional development and biodiversity, and she is committed to fulfil the opportunities for regional industry development that exist within technology, renewable energy, the marine industry, sustainable agriculture, aquaculture and tourism. Vestland county has set an ambitious goal, “Operation Zero Emission 2030”, that Natalia has been the foremost advocate for. Her insights from real life politics are a valuable contribution to the conversation on how to prioritize climate action in the local context.

# Vigdis Vandvik

*Professor of plant ecology at the University of Bergen*

## Keynote 2: Prioritizing climate change in theory and practice

Climate action must be a priority across all areas of society. A theme for the Beyond Oil conference 2021 is to discuss what it means to prioritise climate action - for the individual, our economy, our political decisions, and our societal institutions. In this session we look at the prioritization and trade-offs that are particularly challenging – for example when climate action can endanger biodiversity and the environment. The panelists will address this from different angles, from philosophical to practical politics.

### Bio:

---

Vigdis Vandvik is professor of plant ecology at the University of Bergen in Norway. Her research is focused on how major global change drivers - especially climate and land-use change - affect plants, from their physiological responses via population and community dynamics to ecosystem functioning. She uses experimental macroecological approaches - replicating field experiments across broad geographical and climatic extents - to disentangle and explore context-dependencies and uncover general patterns in these responses. Field experiments offer many opportunities for student-active research, and her research projects are also test-beds for developing effective ways of teaching and learning as integral components of 'real' research projects. She is elected member of the Norwegian Academy of Science and Letters and the Norwegian Technical Science Academy. She communicates science through a variety of channels, and is actively involved in the science-policy interface, both within Norway and internationally, for example as a coordinating lead author on the Intergovernmental Panel on Biodiversity and Ecosystem Services assessment of Invasive Alien Species (IPBES-IAS).

# Stuart Capstick

*Deputy Director, Centre for Climate Change and Social Transformations (CAST) School of Psychology, Cardiff University, Park Place, Cardiff @ StuartBCapstick*

## **Keynote 3: There is no 'I' in individual: the need to connect personal, collective and systemic climate action Floyd: reflections on the UK environment sector**

Is climate action down to you and me, or do we need deep-rooted systemic change? A backlash has developed against placing the obligation upon individuals to reduce emissions and tackle environmental problems. This arises in part because meaningful action at the individual level is seen as infeasible, given that people are locked into societies that run on fossil fuels. Pervading this critique also is a hostility to the neoliberal view of individuals as choice-making consumers, which in turn masks widespread power imbalances and injustice. The deliberate

efforts of major oil corporations to promote personal responsibility is seen as further evidence of the bad faith nature of this argument, and of attempts to deflect attention from industry – if not the capitalist system itself – being ultimately to blame for the problems we face.

In order to address the climate and ecological emergency, wide-ranging social transformations are indeed necessary, whether in terms of current economic paradigms, political and policy structures, or shifts in contemporary ways of life. However, this cannot itself be achieved without the active participation of citizens in enabling that change. Whether by moving away from unsustainable practices, shifting cultural norms and changing public discourse, challenging the social licence afforded to destructive industries, or opposing the politics of climate delay, citizens and their actions are a necessary and integral part of social transformation. I will discuss research and ideas that point to a need to rethink the role that citizens have in tackling the climate crisis, and draw attention to the many ways in which people are connected to and influence each other, ultimately with the potential to help shape a better, low-carbon society.

## **Bio:**

---

Dr Stuart Capstick helps to lead the Centre for Climate Change and Social Transformation (CAST Centre) and is active within the Tyndall Centre for Climate Change Research. His work focuses on how people understand and respond to the climate crisis, at all scales from the

household to the national level. He has led work for the United Nations Environment Program on accomplishing equitable and low-carbon lifestyle change and is a co-author of the annual Lancet Countdown on Health and Climate Change. He counts himself among the climate alarmed and is keen to move past the unhelpful individual-systems dichotomy in pursuing effective climate action.

# Camilla Houeland

*Postdoctorate fellow at the Intitute for sociology and human geography, University of Oslo*

**Keynote 3: There is no 'I' in individual: the need to connect personal, collective and systemic climate action Floyd: reflections on the UK environment sector**

Camilla Houeland will comment Stuart Capstick's keynote.

## Bio:

---

Camilla Houeland is a postdoctorate fellow at the Institute for sociology and human geography at the University of Oslo, where she works on oil workers' roles and agency in a green transition, in Norway and Nigeria. Theoretically she works on the political economy of oil, labour geography, and social movement theories, including questions of fossil fuels, the social contract and (industrial) citizenship.

The top half of the page features a background image of an oil rig. The rig is rendered in a semi-transparent, stylized manner with a color palette of teal, red, and white. A large, semi-transparent white circle is superimposed over the rig, framing the text. The text 'THANK YOU!' is written in a large, bold, white, sans-serif font, centered within the circle.

**THANK YOU!**

**Thank you for joining us for  
Beyond Oil 2021:  
Prioritising Climate Action.**

**We hope to see you again in 2023.**

# **BEYOND - OIL:** Prioritising climate action
